

Appointments and Education

University of Maryland (College Park, MD)

- Jan 2025– **Assistant Professor**, *Fischell Department of Bioengineering, Department of Electrical & Computer Engineering (aff.), Neuroscience & Cognitive Science (aff.)*.
- Fall 2024 **Visiting Assistant Professor**, *Fischell Department of Bioengineering, Department of Electrical & Computer Engineering (aff.), Neuroscience & Cognitive Science (aff.)*.

Massachusetts Institute of Technology (Boston, MA)

- Fall 2022 **Visiting Scientist**, *McGovern Institute for Brain Research*.

Georgia Institute of Technology (Atlanta, GA)

- 2019–2024 **Postdoctoral Fellow**, *Wallace H. Coulter Department of Biomedical Engineering*.
- 2017–2018 **Postdoctoral Fellow**, *School of Chemical and Biomolecular Engineering*.

Cornell University (Ithaca, NY)

- 2011–2017 **Ph.D.**, *Electrical and Computer Engineering*.
(Thesis: statistical modeling and inference in biological data)
Minor in Cognitive Neuroscience
Minor in Applied Mathematics

- 2015 **M.S.**, *Electrical and Computer Engineering*.

University of Rochester (Rochester, NY)

- 2007–2011 **B.S.**, *Electrical and Computer Engineering*.
B.A., *Mathematics*.
Minor in Music; Cumulative GPA 3.86/4.00 (magna cum laude)

Selected Honors and Awards

- 2023–2027 NIH BRAIN K99/R00 Pathway to Independence Award
- 2020 OHBM Annual Meeting Oral Presentation - Selected 4.5% OHBM abstracts
- 2016 EMBS Student Paper Competition Finalist - Top 0.4% EMBS conference proceedings
- 2016 Travel Award, IEEE International Conference of EMBS
- 2016 Conference and Research Travel Grant, Cornell University
- 2015 "Top 10%" Paper Recognition, IEEE International Conference on Image Processing
- 2011–2012 Goldman Sachs & Co. Scholarship - Top 0.15% applicants in America
- 2012 Edgar Maeyer Fellowship, Cornell University
- 2011 John M. Olin Fellowship, Cornell University
- 2011 ECE Faculty Award, University of Rochester - most accomplished ECE student(s)
- 2010 Deans' Prizes, Undergraduate Research Symposium, University of Rochester
- 2009 Distributed REU Award, Computing Research Association - Top 15% applicants in America, funded summer research at Brown University
- 2009 First Place, Concerto Competition, University of Rochester
- 2011– Phi Beta Kappa Honor Society
- 2009– Tau Beta Pi Honor Society

Research & Publications

(* corresponding authors, + equal contributions, my mentees, working papers (W), journal articles (J), conference papers (C), technical papers (T). See more details on my [webpage](#).)

Modeling & inferences in causal interactions among brain networks

Invited Talks (Selected)

- 1 “Advanced mathematical modeling and analysis in biomedical data: unraveling the complexities of brain networks and virus structures.” Georgia Tech, Electrical & Computer Engineering Seminar, Feb 2024.
- 2 “Statistical learning and dynamic analysis in functional neuroimaging data.” University of Illinois Urbana-Champaign, Bioengineering Seminar, Feb 2024.
- 3 “Advanced mathematical modeling and analysis in biomedical imaging” University of Maryland, Bioengineering Seminar, Feb 2024.
- 4 “Modeling and inferences in spatiotemporal dynamics among the functional brain networks.” University of Washington Medicine Diabetes Institute, the Brain, Body and Appetite Research Collaborative Science Seminar, Dec 2023.
- 5 “Causal interaction modeling and inference within brain networks.” MIT’s McGovern Institute for Brain Research, Sep 2022.
- 6 “Infraslow brain dynamics modulated by visual stimulation in human brains.” Georgia Tech-Emory University, Coulter Biomedical Engineering Seminar, Oct 2021.
- 7 “Investigation of spatiotemporal functional interactivity among large-scale brain networks.” OHBM Annual Meeting, Online Virtual Meeting (due to COVID-19), Jun 2020.
- 8 “Statistical inferences on brain cognitions measured by functional MRI.” Emory University, School of Medicine, Department of Psychiatry and Behavioral Science, Mar 2017.
- 9 “Mathematical modeling and novel inferences on biological data.” Emory College of Art and Sciences, Physics Department, Mar 2017.
- 10 “Statistical characterization of ensembles of symmetric virus particles: 3-D stochastic signal reconstruction from electron microscope images.” The 38th Annual International Conference of the IEEE Engineering in Medicine and Biology Society (EMBC), Aug 2016.
- 11 “Statistical image reconstruction for symmetric virus particles.” Scripps Research Institute, Department of Integrative Structural & Computational Biology, Dec 2015.

Technical Skills

Programming	MATLAB, C, C++, MATHEMATICA, R, PYTHON, JAVASCRIPT, SHELL SCRIPT
Software	Linux, MS Windows, L ^A T _E X, UCSF Chimera, SPM, AFNI, FSL, ANTs, ImageJ, OMERO
Advanced Skills	Physical, mathematical & statistical modeling, Monte Carlo calculations, Design of statistical inference & machine learning & optimization algorithms, Design & implementation of software systems, Big data & image processing, Scientific computing, fMRI analysis, Computational neuroscience
Completed Grad-level Courses	Statistical signal processing & learning, Machine learning, Statistical principles, Theory of statistics, Statistical inference & decision, Funds of data compression, Functional data analysis, Matrix computations, Math programming I & II, Convex analysis, Applied stochastic processes

Professional Contributions

Member	CNS, OHBM, ASFNR, IEEE, IEEE SPS, IEEE EMBS
Referee	Journal: Security and Communication Networks, Frontiers in Neuroscience, Frontiers in Neural Circuits, Network Neuroscience, Neuroimage. Conference: OHBM Annual Meeting.

Teaching, Mentoring & Managing Experience

Georgia Tech and Emory University (Atlanta, GA)

- 2020– Mentor, *2 PhD research projects (School of Psychology, Dr. Eric Schumacher group)*
- Guided (weekly) a 3rd-year Ph.D. student, D.T. Seeburger, on dynamic analysis for identifying the neural mechanisms of zone state performance: published in C11 & J7.
 - Guided (weekly) a 3rd-year Ph.D. student, S. Dhawan, on BOLD data analysis for detecting infraslow dynamic patterns effected by psychomotor vigilance task: 1 CNS paper (C12).
- Fall 2021 Leader, *fMRI data processing workshop (BME)*
- Designed 2-hr weekly training on fMRI data processing for neural engineers and neuroscientists.
 - Expanded the use of data processing and analysis pipeline I developed in multiple research labs: Dr. Schumacher's lab in Psychology at Georgia Tech (using W6), Dr. Singer's and Dr. Keilholz's labs in Gatech-Emory BME and Dr. Chuang K-H's lab at the Centre for Advanced Imaging and Queensland Brain Institute in Australia (using J9).
- 2019–2021 Mentor, *4 undergraduate research projects (NEUR 2699, BMED 2699, BMED 4699)*
- C. Kadiresan(SysEng): developed a [database](#) (GT-VPN needed) for connectome of C. elegans.
 - G. Jenó (CS): published in C13 & J5.
 - L. Zhang (BME) and S. Larson (CS): published in J9, W1.
 - M. Ma (CS): published in C11, C12, J7.
- Summer 2018 Mentor, *NSF Emergent Behaviors of Integrated Cellular Systems (EBICS) REU project*
- Provided daily guidance for a biology undergraduate, D. Lee, from a minority ethnic group, on C. elegans neural image processing. Lee had 5 NSF REU presentations about this work.

Cornell University (Ithaca, NY)

- Fall 2016 Teaching Assistant, *Introduction to Circuits for Electrical and Computer Engineering*
- Fall 2015 Teaching Assistant, *Random Signals in Communications and Signal Processing*
- 2014–2015 Mentor, *a research project of 8 master students (ECE 6930, ECE 6931)*
- Mentored a 1-year interdisciplinary MEng project "Simulator for Realistic Brain Signals."
